

May-June 2007 HepTalk Listserv

Welcome to the HepTalk Listserv. We are sending you just one important resource for May and June, a **guide for interpreting immunization schedules from Mexico**, including Hepatitis B. We hope you will copy and laminate this guide for each of your exam rooms.

1. Bi-National Immunization Guide: Interpreting Immunization Schedules Mexico to California, available here <http://www.immunization-sd.org/healthcare/eng/materials.html> A pdf version of the document is also attached to this message for you to print out.

This is an important resource to help understand and interpret vaccinations in Mexico. Though the guide is keyed to California, and thus may not match exactly to your state's immunization schedules, the Mexican document "*Cartilla Nacional de Vacunacion*

1. " is national and the second page of this resource includes "Tips on Interpreting Mexico's National Immunization Record."

Note: Information from the United States Mexico Border Health Commission is that the CDC is working on a comparison schedule between Mexico, and all of the US. We will keep you informed.
